EDUCATION

Polytechnic University of the Philippines

2022 – 2026

Bachelor of Science in Information Technology | **Magna Cum Laude** | **GWA: 1.19**

WORK EXPERIENCE

Chevron Holdings Inc. | Software Engineer Intern

March 2026 – July 2026

6750 Ayala Avenue Makati City Metro Manila

- Onboarding Agentic System: Built an end-to-end onboarding automation system using Power Platform (Canvas Apps, Power Automate) and Copilot Studio, cutting onboarding time by ~50% and saving current team members 3-4 hours per new hire by automating file retrieval and task handoffs.
- AI Enablement (TechBlaze AI Cohort): Trained non-technical/business users on leveraging Copilot Studio for their own workflows as part of an internal Chevron AI upskilling initiative, expanding AI adoption beyond the tech team.

Tambuli Labs | Software Developer I

November 2025 – March 2026

AAP Tower, New Manila, Quezon City

- Performance Tracking System: Engineered a comprehensive personnel management system to track performance metrics, enabling data-driven decisions for task allocation and promotions supporting 20,000 personnel.
- Workflow Optimization: Streamlined the candidate retrieval process by centralizing personnel data, successfully reducing search time from days to minutes compared to previous manual repository searches.
- Rapid Delivery: Delivered a responsive Full Stack solution (React/Django) strictly on time within a high-pressure one-month timeline, utilizing Shadcn/UI for rapid development.

PROJECTS

[FlowGram](#) | Full Stack Developer

July 2026 – August 2026

- Built a Progressive Web App for AWS Community Day Manila 2026 to help attendees track live segment status, plan breakout room attendance, view speaker details, and receive real-time notifications.
- Designed for reusability across future events, turning a single-conference tool into a repeatable event-tech platform.

[ThesISKO](#) | Full Stack Developer & Project Manager

September 2025 – December 2025

- Cloud-Native Architecture: Designed a scalable repository using AWS S3 for object storage, Supabase for real-time database management, and MongoDB for flexible metadata handling.
- AI-Powered Search: Integrated the all-MiniLM-L6-v2 transformer model to enable accurate, high-speed semantic search under 500ms without overburdening backend processes.
- Security & RBAC: Secured RESTful API endpoints with Role-Based Access Control, rate limiting, and file encryption to protect sensitive research data and ensure accessibility for future researchers.

CERTIFICATIONS

- Microsoft Certified: Azure AI Apps and Agents Developer Associate
- Microsoft Certified: Azure Data Fundamentals
- TESDA: Programming (Java) NC III

September 2026

December 2025

March 2024

TECHNICAL SKILLS

- Web Development: React | Node.js | Django
- Cloud & DevOps: AWS (S3, EC2) | Azure | Supabase | Docker | Vercel | Git
- AI & Data: Python | SQL | PostgreSQL | MongoDB | Hugging Face
- Automation: Microsoft Power Platform (Power Apps, Power Automate) | Copilot Studio
